SUMMARY

A junior web developer focusing on the MEAN stack, with the ability to learn and apply new concepts quickly.

EXPERIENCE

Resident TA, Coding House

Fremont, California — 2015

Currently a resident teaching assistant at a local coding bootcamp. My day typically involves helping brand new developers work through problems by guiding them to the answer, rather than giving it to them outright.

I'm the Head Resident, meaning I have to delegate tasks to the other six residents, as well as leading evening workshops in several subjects and scheduling daily events.

Accomplishments

- Was selected to be the Head Resident
- More to come, I've just started!

Field Operations Manager, Shattuck, LLC

Austin, Texas — 2009-2014

Was responsible for the operations of an online auction and appraisal service. Managed time, assets, and employees, as well as streamlined the process of the auctions, reducing time lost and increasing overall profits.

Accomplishments

- Reduced job completion time by up to 40%
- Maintained a client satisfaction rating of 99%

EDUCATION

Coding House

Completed a rigorous coding bootcamp — 2015

I was a student in the April 2015 Cohort. I learned many frameworks and technologies including: Angular JS, jQuery, Firebase, Bootstrap, Materialize, Node JS, Hapi JS, Mongo DB w/ Mongoose, TDD with Lab/Mocha, AWS S3 deployment, and many more.

SKILLS

- Ability to work and learn in a team environment
- Learning new information quickly
- Web Development with previously mentioned tech
- Asking good questions, giving good answers when I'm knowledgeable
